

# The Company

## | The Company

- Our activity Founded in 1988, BIOTROPICAL is specialized in the production and processing of fruits and vegetables certified organic. These fruits are distributed in fresh state, harvested at full maturity and ready to be consumed.

-- The frozen fruit pulp is made from fresh fruit

-- A wide range of dried fruit is produced from fruit harvested at full maturity.

- Our objectives-- To promote organic farming within our business in all its forms (respect for the land, cultural cycles, respect for the environment) through economical management of available resources.

-- Promoting the organic idea around in our company through our practices and the widest possible dissemination of our expertise.

Inventory-traditional skills in order to validate and promote those that correspond to the requirements of specifications that best suit our vision of development, ethics and exchanges between peoples in a world where each and Other interact harmoniously.
